

SEIHO - PK - ALUMINUM SPOT DIFFUSER FEATURES

PK / PK-E Aluminum Spot Diffuser Features

- The model PK and PK-E can be mounted in a vertical or horizontal position or any angle in between. The architect or engineer has unlimited applications and an infinite choice of mounting locations.
- The ventilation efficiency of the PK and PK-E allow long airflow throws to ventilate or condition remote areas where ducting would be impractical or cost prohibitive.
- The directional control can pinpoint the airflow where it's needed as space or occupant configurations change. This feature makes these units ideal for use on stages and movie sets.
- The modulating volume control allows precise adjustment of airflow in all application without need for special tools, removal or disassembly (PK).
- The lightweight and corrosion-resistant finish make these units easy to install and tailored to a variety of applications. Its solid construction makes this unit rugged and durable in adverse conditions, without possibility of failure of a weld or rivet.
