Preparing the Remote Control

The remote control is already paired for use.

To access the battery compartment, remove the small Phillips head screw that secures the battery door to the transmitter assembly. The battery should be installed with the positive (+) side up. Replace with a CR2032 battery when necessary.

The remote transmitter should already be paired to the receiver and ready to use.

Note: If you need to pair your remote, turn fan power off and back on at the wall switch. Within 3 minutes, press and hold both the Fan Off button and the High button for 4 seconds to pair the remote. **To prevent faulty operation, please ensure all other ceiling fans within range are turned off at the wall switch while pairing.**

For your convenience, a remote function card is packed in with your remote.

To turn on fan, press a fan speed button. Speeds range from off (0) to high (3). Quickly press the Light button to turn the lights off and on.

Using the Remote Control Cradle

To install the transmitter cradle, remove the two screws holding the switch cover plate. Do not remove the cover plate. Orient the cradle by lining up the two mounting holes with those on the cover plate. Insert and tighten the screws. Do not over tighten.

Note: For rocker-style cover plates, break off the tabs by pushing outward.
