Attach the black wire from the light fixture to the black wire in the electrical box. Attach the white wire from the light fixture to the white wire in the electrical box.  
**NOTE: Do not disconnect any pre-wired connections.**

4. Once connections of wires are completed, carefully tuck wires and wire nuts into the electrical box making sure no bare wire (on the black and white) is visible at the wire nuts.

5. Re-tighten the 4 screws to install the fixture.

6. After installation, seal around the top and side perimeter between the fixture and the wall surface with weather resistant caulking.
