PLAN THE WIRING

Internal Blower Installation

- The Internal Downdraft Blower system draws 4 AMPS and requires a 120 VAC, 60 Hz circuit.
- The unit has a 18 in. long power cord with a 3-pronged plug. Plan to provide a grounded outlet in a location which will allow the unit's power cord to reach. IMPORTANT - LOCATION OF ELECTRICAL OUTLET:
- or Model RMDD3604 is being installed in a 36" wide
- or Model RMDD4804 is being installed in a 48" wide ...the outlet cannot be located on the back wall of cabinet.

- In these cases, the width of the downdraft covers nearly the entire width of the back wall of the cabinet. So you must either:
- mount the electrical box to a side wall or cabinet floor at least 12 inches from the back wall. mount the electrical box to a wall stud behind the cabinet- where it will not be covered by the downdraft. en provide a clearance hole in the back wall of the

External Blower Installation

- The External Downdraft Blower system draws 6 AMPS and requires a 120 VAC. 60 Hz circuit.
- The unit has a 18 in. long power cord with a 3-pronged plug. Plan to provide a grounded outlet in a location which will allow the unit's power cord to reach.

IMPORTANT - LOCATION OF ELECTRICAL OUTLET: or Model RMDD3604EX is being installed in a 36" wide

del RMDD4804EX is being installed in a 48" wide ...the outlet cannot be located on the back wall of cabinet.

In these cases, the width of the downdraft covers nearly the entire width of the back wall of the cabinet. So you must either:

mount the electrical box to a side wall or cabinet floor - at least 12 inches from the back wall.

PREPARE THE DOWNDRAFT

Blower Duct Connection Installation (all blowers)

- Remove the 4 nuts and 2 clamp channels.
- 3. Remove 2 screws and the gear motor cover Carefully position the blower under the bottom flange of the downdraft with the 3¼" x 10" discharge (3¼" x 14" for exterior or in-line blower) pointed in the desired direction.
- Replace the gear motor cover and 2 sheet metal screws
- Replace the 2 clamp channels and start the 4 nuts, do not tighten. Slide blower left of right to desired position. Use **cover plate** (supplied) to close up any open space.
- Tighten 4 nuts to secure top of blower. Use additional screws (supplied) through bottom flange to secure bottom in blower.

BREAN Elite

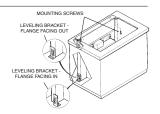

Page 7

MOUNT THE UNIT

All Units

- Secure the downdraft to the countertop as follows: Hold the downdraft against the back of countertop cut-out and tightening the two mounting screws (one on each end of unit) on underside of countertop. Use a wood shim between screw and underside of granite countertops.
- Screw leveling brackets to bottom of cabinet. Tighten screws holding leveling bracket to unit on each side.

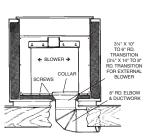

INSTALL DUCTWORK

Blower Installation

- 1. Cut hole in cabinet as well as holes in wall or floor as neces

Note: A 31/4" x 10" collar (31/4" x 14" collar for external blower) is provided for installers who prefer to rivet the ductwork to the unit. This will allow blower to be removed and replaced easily in service situations without disturbing ductwork.

INSTALL ELECTRICAL WIRING

Internal Blower Installation

- Mount a standard wiring box, with 3-pronged receptacle, inside the cabinet. Make sure the downdraft's power cord can easily reach it.
- Run appropriate power cable into cabinet and connect it to receptacle.
- Plug the downdraft's power cord into the outlet. Make sure that the power cord is routed away from the heat generated by the cooktop.

External Blower Installation

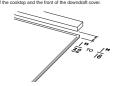

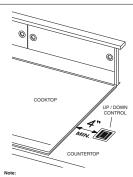

- Mount a standard wiring box, with 3-pronged grounded receptacle, inside the kitchen cabinet. Make sure the unit's power cord can easily reach it.
- Run appropriate power cable into cabinet and connect it to electrical box and receptacle.
- External blower may not exceed 6.0 Amp rating.
- Run 2-wire plus ground power cable from the external blower to wiring box on adaptor plate. Remove wiring box cover.
- Connect wiring harness to power cable from external blower.
 Wire black to black, white to white, and green to green or bare
- Plug the downdraft's power cord into outlet. Make sure that the power cord is routed away from the heat generated by the cooking.

INSTALL COOKTOP

All Units

Align the cooktop with the downdraft and fasten cooktop in place.
